

Air 1 is heard through out the United States and is listener supported by those of us who believe in the positive message but it is beneficial to those local communities where it is heard BECAUSE of its positive, encouraging messages, music, and support including counselors available 24/7 to anyone needing to talk. ESPECIALLY FOR TEENAGERS and young adults whom are the primary focus for this station. If enough locals do not support the local channel, it will not continue to be funded so it is LOCAL though nationally programmed ... As a Christian, I personally help fund this station to stay on the air (93.7 in Marked Tree/Jonesboro, Arkansas) and encourage others to do so as well so that our youth will have a clean, decent CHRISTIAN ORIENTED hard alternative rock station to listen to. And kids LISTEN! The listenership locally is growing leaps and bounds. There are parents like me (age 48) who still like this style music as well. This station is DEFINITELY in the public interest for other reasons as well. There are kids who are suicidal who have heard music on Air 1 that speaks to them and changes their mind and they call the 24/7 available counselors and their lives are saved AND changed. One kid is worth it. Don't authorize these low power (LPFM) stations to take away our Air 1. It's not fair!!!
